

FLEXITOOOL

FL52ERA – a new tool for cable marking

At last a new tool has arrived that makes things much easier for anyone whose work involves marking cables. The tool is the FL52ERA, it has been developed by FLEXIMARK and it is part of the FLEXITOOOL series of tools.

FL52ERA has a number of new functions and built-in features. You can use the same tool for different strip sizes, and it even has a hole punch for screw fixing. We have also incorporated a useful measuring rule so you can easily cut your marker strip to the correct length. The tool is ergonomically designed and is naturally an integrated component of the FLEXIMARK system for marking cables and components in the field.

BRIEF FACTS

Weight: approx. 200 g
Handles/pliers: Glass-reinforced polyamide
Hole punch: Tool steel
Punch guides: Chromated brass
